	Page
บทคัดย่อ.....	ii
ABSTRACT	iv
ACKNOWLEDGEMENTS	v
TABLE OF CONTENTS	vi
LIST OF TABLES	viii
LIST OF FIGURES	ix
CHAPTER	
1 INTRODUCTION	1
1.1 Research Motivations	1
1.2 Research Objective.....	7
1.3 Scopes of Study	7
2 BACKGROUNDS AND LITERATURE REVIEW.....	9
2.1 Boesenbergia Pandurata	9
2.2 Dental carries.....	12
2.3 Streptococcus mutans	17
2.4 Mouthwash	18
2.4.1 Mouthwash manufacturing process	21
2.4.2 Composition of mouth wash	23
2.5 Toothpaste	29
2.5.1 Toothpaste manufacturing process	33
2.5.2 Herbal Toothpaste	34
2.6 Thai herbs	35

TABLE OF CONTENTS (Cont.)

	Page
3 RESEARCH METHODOLOGY.....	39
3.1 Materials and Testing Instruments	40
3.1.1 Materials and Chemicals.....	40
3.1.2 Testing Instruments.....	41
3.2 Experimental Procedure	42
3.2.1 Preparation of <i>Boesenbergia pandurata</i> powder	42
3.2.2 Solvent extraction process of <i>B. pandurata</i>	43
3.2.3 Hydrodistillation process of <i>B. pandurata</i>	43
3.2.4 Bacterial strains and culture conditions	44
3.2.5 Determination of inhibition of <i>Streptococcus mutans</i>	44
3.2.6 Preparation of Mouth care product	45
3.2.7 Time kill Analysis.....	47
3.2.8 Community Technology transfer	48
4 RESULTS AND DISCUSSIONS	50
4.1 Optimal extraction condition of <i>B. pandurata</i>	50
4.1.1 Extraction of <i>B. pandurata</i> by solvent extraction	50
4.1.2 Extraction of <i>Boesenbergia pandurata</i> by hydrodistillation ..	57
4.2 Testing of developed mouth care with <i>B. pandurata</i> extraction with Time Kill Analysis	57
4.3 Results of technology transfer workshop	58
5 CONCLUSIONS AND SUGGESTIONS	63
REFERENCES.....	66
BIOGRAPHY	71

LIST OF TABLES

	Page
Table 2.1 List of Thai herbs	36
Table 2.2 Medicinal properties of Thai herbs	37
Table 3.1 Composition of Mitis Salivarius Agar (MSA).....	40
Table 3.2 Composition of Tryptic Soy Broth (TSB)	41
Table 3.3 Main composition of powder toothpaste	47
Table 3.4 Main composition of mouthwash	47
Table 4.1 Inhibition of <i>Streptococcus mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from solvent extraction at 1 day of immersing time by Disc Diffusion Method.....	52
Table 4.2 Inhibition of <i>Streptococcus mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from solvent extraction at 1 day of immersing time and dilution ratio at 1:7 by Broth Microdilution Method	54
Table 4.3 Inhibition of <i>Streptococcus mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from 95% of ethanol extraction at several of immersing time by Disc diffusion method	54
Table 4.4 Inhibition of <i>S. mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from 95% of ethanol extraction with dilution ratio at 1:7 and several of immersing time by Broth Microdilution Method	56
Table 4.5 Inhibition of <i>Streptococcus mutans</i> ATCC 25175 with <i>B. pandurata</i> Hydrodistillation extract by Disc Diffusion Method	56
Table 4.6 General Information	59
Table 4.7 Knowledge and Technology Transfer.....	60

LIST OF FIGURES

	Page
Figure 2.1 Fresh rhizomes of <i>B. pandurata</i>.....	10
Figure 2.2 Structure of Panduratin A.....	11
Figure 2.3 Dental carries bacteria	18
Figure 3.1 Experimental frameworks	39
Figure 3.2 Cutting area for <i>B. pandurata</i> oil extraction	42
Figure 3.3 Hydrodistillation process of <i>B. pandurata</i>.....	44
Figure 3.4 Powder toothpaste with <i>B. pandurata</i> extract.....	46
Figure 3.5 Mouthwash with <i>B. pandurata</i> extract	46
Figure 4.1 Minimum inhibitory concentrations (MIC) of <i>S. mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from Solvent extraction at 1 day of immersing time.....	52
Figure 4.2 Minimum inhibitory concentration of <i>S. mutans</i> ATCC 25175 with <i>B. pandurata</i> extract from Solvent extraction at 95% with 1:7 dilution ratio, and several immersing day	55
Figure 4.3 Time kill curve analysis of mouth care products.....	58
Figure 4.4 Workshop on mouth care production	62
